NAGA[®] nord

UNIQUE DANISH DESIGN ON YOUR WALL

The board is delivered in a gift box, with screws and plugs

SIMPLE NORDIC STYLE

This product range offers exciting materials, shapes and colours with many options for storage as well as decoration. Especially developed in a simple Nordic style, all materials, surfaces and colours are selected with inspiration from nature.

These uniquely shaped design products can be mixed and matched in many possible combinations to fit any interior style.

MAGNETIC CIRCLE BOARDS

A magnetic circle board, makes it possible to combine simple Nordic style and functionality. All the boards are magnetic, which allows you to attach various accessories onto the board with our super-strong magnets.

The glass boards also have a write-on/wipe-off function. You can write on the glass with a chalk marker or a regular whiteboard marker, and once the text has dried, you can easily wipe the board clean with a chalkboard eraser or a dry cloth.

INSPIRATION FROM NATURE

NAGA magnetic circle boards in a great variety of materials, surfaces, sizes and colours. The boards are produced from natural materials, so the exactly identical colour and structure from board to board can't be guaranteed.

We have prepared a guide for the care and maintenance of the boards, so it can last for a long time. Please note that the boards is affected by daylight and wear.

How to care

WOOD BOARDS:

NAGA wood boards are made of high-quality plywood. Plywood is a natural material and there will therefore be natural variations in the surface texture and colour. The surface is affected by light, and over time it will change texture and colour. Always use microfibre cloths for maintenance and cleaning. They are soft and will not damage the surface. There are 2 different types of NAGA Nord wood boards:

OAK: This is a soap-treated board that should be maintained using a damp cloth with soap flakes dissolved in water.

WALNUT: This is a lacquered board that can simply be wiped clean with water. Use a slightly damp cloth.

GLASS BOARDS:

In addition to the magnetic function, coloured and printed glass boards also have a write-on/wipe-off function. You can write on the glass with a chalk marker or a regular whiteboard marker, and once the text has dried, you can easily wipe the board clean with a chalkboard eraser or a dry cloth. For thorough cleaning, use whiteboard cleaner or a soft cloth. It is important you use a soft cloth to avoid scratching the glass.

Easy installation instructions

1. There is a metal back on the board. The back plate is provided with 4 holes. One hole is for hanging and the other holes are simply to ensure that the board hangs flat on the wall.
2. Mark the location on the wall and drill a hole.
3. Insert the raw plug into the hole.
4. Screw in the screw.
5. Hang the board on the screw. You're finished! Your board is ready for use.

Super Strong Magnets

Please note!

Only Super Strong magnets and accessories can be used on NAGA magnetic boards. There is a wide range of specially designed super strong magnetic NAGA accessories.

Magnetic Circle Boards

All boards are magnetic, allowing you to attach various accessories onto the board with our super strong magnets. The glass boards also have a write on/wipe off function.
